VirtuCrypt**Labs**

Production Environment Replication for Testing

Cloud-Based Development and Testing Environment

VirtuCrypt Labs offers organizations a secure development and testing environment that mirrors their full production cryptographic infrastructure. Utilizing the power of the VirtuCrypt cloud, users can simulate hardware additions, firmware upgrades, system updates, and any number of other changes in a risk-free environment.

KEY FEATURES

MIRRORS PRODUCTION ENVIRONMENT
Provides a customizable exact replica of your organization's production environment

INDUSTRY-COMPLIANT TESTING
VirtuCrypt Labs utilizes FIPS 140-2 Level 3-validated Futurex hardware

VERSATILE ACCESS METHODS
Manage from the VirtuCrypt Intelligence Portal (VIP) Dashboard or the Securus

KEY BENEFITS

REDUCES RISK OF DOWNTIME
Test changes to firmware, configuration, and applications before production deployment

SAVES TIME AND MONEY
Less resource-intensive than maintaining an internal testing enviroment

EXPEDITES NEW INITIATIVES
Eliminate delays involved with hardware additions and proof-of-concept testing
